

APXT1/JR1

Three mini guitars that are small in size but big on quality and sound. Based on the APX series, the APXT Traveler series are quality hollow body guitars with spruce tops, alder sides and maple necks. Both the steel string and nylon string versions incorporate 22-fret necks that are accurately intonated and easy to play.

The steel string JR1 is modeled after the FG series. Yamaha craftsmanship and the use of select woods throughout this instrument create a compact folk guitar offering authentic acoustic sound.

JR1

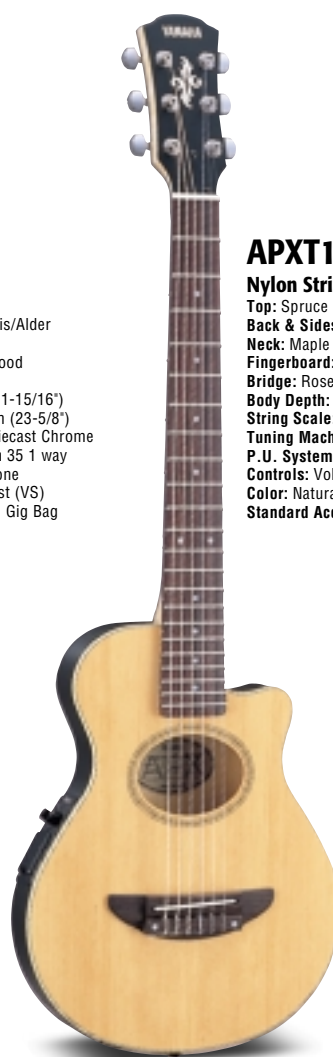

Top: Spruce
Back & Sides: Meranti
Neck: Nato
Fingerboard: Rosewood
Bridge: Rosewood
Body Depth: 80-90mm (3-1/8"-3-9/16")
String Scale: 540mm (21-1/4")
Tuning Machines: Opened Chrome

String Scale: 600mm (23-5/8")
Tuning Machines: Diecast Chrome
P.U. System: System 35 1 way
Controls: Volume, Tone
Color: Natural
Standard Accessory: Gig Bag

Responsive Pickups

The same highly efficient pickups used in the APX line are responsible for the Travel Guitar's incredible sound. A single, bridge mounted piezo-electric pickup produces warm, rich lows with crystal clear highs that are oblivious to the guitar's small size.

Preamp

Tonal flexibility is provided with a specially designed preamp with volume and tone controls and powered by a 9V battery.
