BLACK 10

10" 2-WAY 2400 WATT LOUDSPEAKER WITH WIRELESS CONNECTIVITY

Designed and tuned in the USA, Black Series 2-way active loudspeakers offer more power, more agility, and more intelligence than any other speaker in their class.

Power for the Black 10 comes from an efficient Class D amplifier capable of producing 1200 Watts of continuous power, with a dynamic/peak power rating of 2400 Watts. The optimized HF waveguide provides an effective 90° x 60° coverage field.

The cabinet features sturdy plywood construction with an anti-scuff coating. The steel grille is finished in a professional-grade powder coating. A custom-molded handle allows easy transport. Steel-reinforced rubber feet provide excellent stability. The Black 10 offers feet on two sides, for vertical or horizontal use. A pole-mount socket (35mm) is fitted into every model. Standard M10 rigging points allow the Black 10 to be flown. The illuminated logo nameplate can be switched off for more discreet installations.

The Black 10 features two XLR+1/4" combo inputs offering individual level controls, and Input 1 is equipped with a Mic/Line switch. The single XLR Mix Output can be set for Pre or Post level controls. The internal DSP EQ can be accessed directly from the rear panel or Live Drive app. All models include a ground lift switch to minimize any unexpected ground loop hum at the venue.

Live Drive is the wireless remote control app available for iPhone, iPod touch, and iPad. Available at the App Store, Live Drive for the Alto Professional Black Series provides remote wireless control over the internal DSP/EQ, Time Alignment, Level and Mute status. The Live Drive app allows each Black Series loudspeaker and subwoofer to be quickly re-adjusted at any time, and from any location to assure peak performance in every venue.

FEATURES

- 1200 Watts continuous (2400 Watts peak)
- 10" LF transducer, 1.75" HF driver with 1" exit
- 2 combo inputs with independent volume controls, and Mic/Line switch on Channel 1
- XLR output to link speakers
- Lightweight, trapezoidal cabinet with handle
- 90° x 60° coverage field
- Stand-/pole-mountable or flyable
- Limit/Clip indicator with red LED
- Ground lift switch
- DSP mode switch for increased EQ control
- Accurate audience coverage, even off-axis
- Designed and tuned in the USA
