

Cartridges mounting dimensions chart

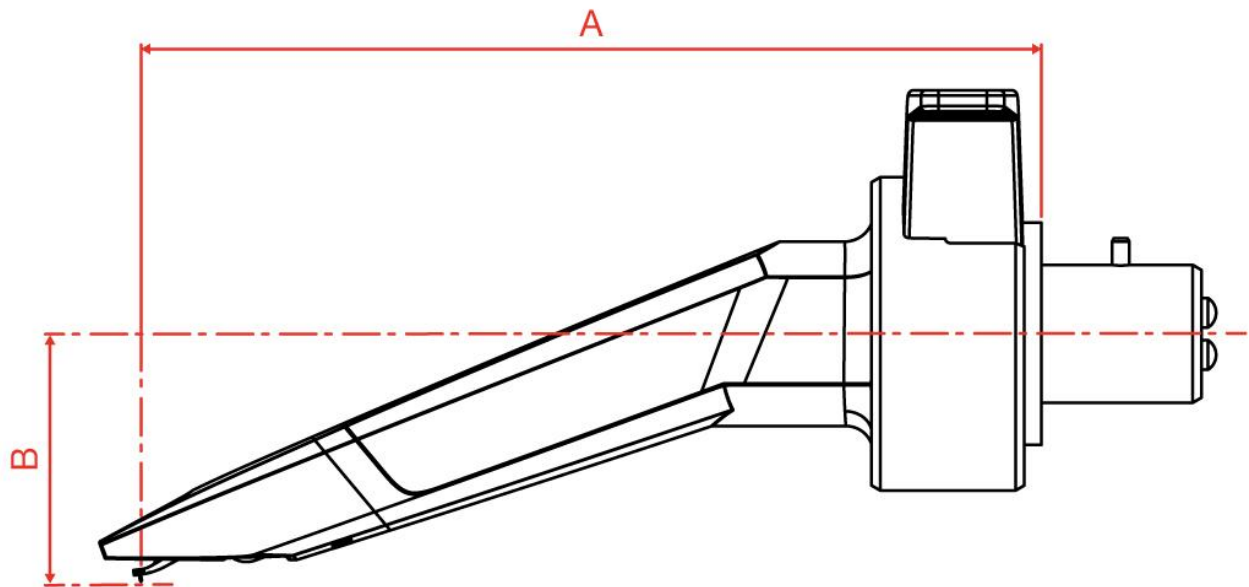

Concorde Cartridge Dimensions Overview

This document provides an overview of the key dimensions for Ortofon **Concorde** cartridges and how they are measured. The illustration below shows the reference points A–B, indicating where each dimension is taken.

Definitions:

- **A – Cartridge length:** The horizontal distance from the stylus tip (during playback) to the rear edge of the rubber suspension.
- **B – Cartridge height:** The vertical distance from the stylus tip (during playback) to the centre of the bayonet connector.

These measurements are taken with the cartridge positioned as it would be during playback, ensuring accurate and relevant reference values for tonearm setup and alignment.

CONCORDE CARTRIDGES

	A	B
Concorde Music Series	52 mm	13.5 mm
Concorde 5 Series	52 mm	13.8 mm
Concorde MKII	52 mm	13.5 mm
Concorde MKI	52 mm	13.8 mm
