

6U rSeries Rolling Rack

Available in 4U, 6U, and 8U sizes, SKB Roto Rolling Racks are roto-molded of Polyethylene (LLDPE) for extra strength and durability. These racks incorporate our one-touch pull handle and back lid mounted wheels to improve ease of transport and help eliminate heavy lifting and carrying.

The exteriors feature SKB's recognizable bar design that signifies the rack unit size on the front and rear lids. Molded bars on top and bottom also provide interlocking capabilities allowing you to easily and securely stack them with SKB's Shallow Racks and Standard Roto Racks, making transport even more convenient and secure. Lids include rubber gasket seals to keep water out. Other standard features include front and rear steel threaded rails and rack screws (10-32 thread), recessed steel Mil-Spec twist latches, flush carry handles, and non-slip rubber feet. All Roto Rolling Racks are 17.6" deep from front rail to rear rail.

Features

- Roto molded of Linear Low Density Polyethylene (LLDPE) for maximum strength & impact resistance
- Available in 4U, 6U, & 8U sizes
