

MANTLE

Congratulations and thank you so much for purchasing the Mantle Bass Preamp / DI. There are so many options out there, and you can rest assured that you made an amazing choice. I am an absolute DI fanatic, owning probably 50+ DIs and preamps. And while they're all great in specific ways, they all either lack something critical or try to stuff in too many features, making for an underwhelming or even overwhelming user experience! This is exactly why I wanted to make Mantle. I needed this product to exist. I'm thrilled to say that now it does. And it is absolutely killer.

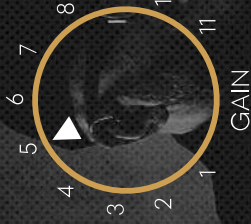

If you look up the word 'Mantle', you find several definitions. One describes the earth's interior between the crust and the core, which speaks to our role as the foundational aspect of a rhythm section. Another describes the mantle as the passing of an important role from one person to another. I think of this as our responsibility to provide support and great low-end power and tone in any situation. And another speaks to a place of honor in someone's home. A focal point. A solid base (pun always intended) upon which to hold important art and relational memories.

I am so excited that this beautiful preamp exists. I hope you're as excited for Mantle to be the solid foundational focal point of your rig as I am!
