

UNIVERSAL BALL MOUNT

DUAL-AXIS MAGIC ARM

The Universal Ball Mount is a high-quality, versatile mounting solution that delivers smooth, precise positioning for microphones, cameras and accessories. Featuring a dual-axis design and a single central locking knob, it provides flexibility and secure control across any setup. With universal threading, a 2kg load capacity and a robust metal build, it offers long-term reliability and seamless integration into any content production workflow.

- High-quality dual-ball mounting adaptor with 360-degree articulation
- Central locking mechanism for fast, secure positioning
- Robust all-metal construction for lasting durability and reliability
- Versatile mounting system with 3/8" male and 3/8" or 5/8" female thread compatibility
- Supports microphones, cameras and accessories up to 2kg
