

ACS Nylon Natural SG

sku: 032150

The ACS blends classical guitar concepts with elements of solid body design. The incredibly comfortable neck of the Multiac ACS, combined with a Maple body & Cedar top, contribute to making it our most affordable synth access guitar ever. Although the body is chambered, the response from the cedar top is more typical of a solid body design than a traditional acoustic guitar. This design results in an instrument that is virtually free of feedback, making it easy to use even when the band gets loud. The engine in the ACS and ACS Slim includes individual transducer saddles powered by a customized preamp system by LR Baggs™. This system not only produces superb amplified sound, but also produces a hexaphonic output through a 13-pin connector enabling direct access to Roland™ GR-Series guitar synthesizers.

Body : Silver Leaf Maple with Canadian Laurentian Basswood Wings

Orientation : Right

Top : Solid Cedar Top

Neck : Mahogany

Fingerboard : Richlite

Fingerboard Radius : 16" (406.4 mm)

Scale Length : 25.5" (647.7 mm)
