compatible), 950kg**

**SHOW
GEAR**

950 kg - black - 80 x 80 x 71 cm

EAN: 8717748626127

The Ballast Counterweight for P Truss is a robust and reliable solution for stabilising truss constructions in demanding environments. Specially designed for use with P-type truss systems, this robust counterweight consists of a durable steel container filled with solid concrete, offering reliable support for both indoor and outdoor setups. With its compact footprint and matte black finish, it blends seamlessly into professional stage, event, and exhibition environments. The 80 x 80 x 50 cm dimensions make it easy to position while providing substantial mass to stabilise heavy loads. Thanks to its adjustable screw-base jacks, it can adapt to any uneven surface.

Please note: Due to the product's size, extra shipping costs may apply in addition to our standard shipping rates. A confirmation will be sent to you for approval before your order is processed.

Special features:

- For P truss
- Weather-resistant construction
- Steel container with concrete core
- Adjustable screw-base jacks
