

REACTOR CONTROL

Official Footswitch for REACTOR Amplifiers

Hands-Free Command

REACTOR Control is designed exclusively for REACTOR guitar amps, giving you seamless, real-time control without breaking your focus. Switch presets, toggle effects, or engage the FX loop with six responsive footswitches, and add an expression pedal for dynamic control over volume, wah, and more. Use it wirelessly for complete freedom, or connect by cable for ultra-stable performance.

When your amp can do more, so can you.

Total Control

Wired or wireless. This is direct integration.

REACTOR Control* is engineered specifically for REACTOR amps. Connect via Bluetooth for full wireless freedom or connect directly for ultra-low latency. No complex setup. No compatibility guessing.

Pair it. Plug it in. Play.

Six Switches.

Out of the box, REACTOR Control is ready to go. Seamlessly switch between two pre-programmed modes.

Preset Mode

Jump between tones instantly. Move through banks. Hit the FX loop without hesitation.

Effect Toggle Mode

Turn individual effects on and off inside a preset.

Six steel footswitches. LED indicators. Clear visual feedback under stage lights.

Add an expression pedal for volume, wah, or assignable control through the REACTOR app.

**REACTOR Control and accessories sold separately.*

Built to Be Stepped On

Compact. Durable. Stage-ready.

- Rugged chassis
- USB-C rechargeable battery with 40+ hours of play time
- Clear battery and wireless status indicators
- Lightweight, pedalboard-friendly footprint

REACTOR creates the tone. REACTOR Control unleashes it.
