Spark LINK XLR

Wireless XLR Audio System

Pure performance. Zero Cables.

Leave your cables behind with Spark LINK XLR – a wireless XLR audio system designed for dynamic microphones and more. Compact and portable, it's ready to go right out of the box with instant pairing, ultra-low latency, and a rechargeable battery that powers hours of performance. Perfect for gigging musicians, vocalists, content creators, or even public speakers, Spark LINK XLR is the easiest way to go wireless and sound amazing doing it.

Made for Performers

Whether you're:

- **Singing live or public speaking**
- **Recording podcasts or livestreams**
- **Capturing acoustic instruments with a mic**
- **Using a DI box or mic-level gear**

Spark LINK XLR delivers pro-quality sound without the hassle of cables.

Key Features

- **Auto-Pairing** – Instant setup with no hassle
- **Low Latency** – Just 3ms delay for tight, live sound
- **High-Quality Audio** – 24-bit/48kHz audio, 20Hz–20kHz frequency response
- **Long Battery Life** – Up to 6 hours on a single charge
- **LED Status Indicators** – Know your connection and battery level at a glance
- **Mute Function** – Silent mode with a quick button press
- **USB-C Charging** – Fast and convenient
- **Supports up to 4 Spark LINK XLRs simultaneously** - can also be used with up to 4 Spark LINKs simultaneously since they operate on separate frequency bands.

Details and specifications subject to change without notice.

Your Entire Setup, Now Wireless

Spark LINK XLR pairs beautifully when connecting a microphone to **Spark LIVE** and **Spark EDGE**—but it's also built to make any setup wireless. Just plug any dynamic XLR microphone into Spark LINK XLR and connect it directly to a PA system, mixer, or audio interface. No complicated setup, no special gear needed. It's wireless that just works.

Spark LINK XLR is compatible with:

- Dynamic microphones that do not require phantom power
- XLR devices with a mic level out

Hear Every Detail

Spark LINK XLR delivers full-range, uncompressed sound with 24-bit/48kHz resolution and 96dB of dynamic range. Whether you're singing or speaking your tone stays crystal clear from the source to the system.

Stay in Sync

Timing matters. That's why Spark LINK XLR is built with ultra-low latency—just 3 milliseconds—so your voice stays perfectly in sync with your performance. No lag, no distractions.

Move Freely

With a transmission range of up to 21 meters (70 feet), Spark LINK XLR gives you the freedom to roam. From crowded stages to street performances, it keeps you connected without dropouts.

Just Plug In and Go

Spark LINK XLR auto-pairs in seconds—no channels to scan, no menus to scroll. LED indicators show you're connected and ready to perform at a moment's notice. Plus, Spark LINK XLR is built for the whole band. Connect up to **four** Spark LINK XLR systems in the same space.

Spark LINK XLR

Bold sound. Simple setup.
No strings attached.
